Description

Ocean Trends Digital is looking for an innovative and hands on Full stack Developer to build and maintain software solutions. The candidate will partner with cross functional teams such as Product Management, Design/UX, and Software Developers to develop clean elegant code using the latest technologies.

Responsibilities

- Developing front end website architecture.
- Designing user interactions on web pages.
- Developing back end website applications.
- Creating servers and databases for functionality.
- Ensuring responsiveness of applications.
- Working alongside graphic designers for web design features.
- Seeing through a project from conception to finished product.
- Designing and developing APIs.
- Meeting both technical and consumer needs
- Staying abreast of developments in web applications and programming languages.

Qualifications

- Strong organizational and project management skills.
- Must know how to use WordPress
- Proficiency with fundamental front end languages such as HTML, CSS, and JavaScript
- Familiarity with JavaScript frameworks such as Angular JS and React
- Proficiency with server-side languages such as Python, Java, PHP and .Net
- Familiarity with database technology such as MySQL, Oracle, and MongoDB
- Excellent verbal communication skills
- Good problem-solving skills
